

## Supporting the integration of environmental and public consultation mechanisms in central and local policies and projects

In the framework of the project "*Supporting the integration of environmental and public consultation mechanisms in central and local policies and projects*", Aarhus Information Center with support and cooperation of OSCE Presence in Albania and National Agency for Natural Resources (AKBN), United Nations Development Programme (UNDP), Ministry of Energy & Industry, the Local Government Units of Orikum, Himare, Lukove, Sarande and Ksamil organized meetings and workshops with the participation of local stakeholders and community groups.

The objectives were:

- ❖ To initiate the dialogue and to increase the public awareness of citizens, groups of interest, stakeholders and local authority about the renewable energy development at local level and enable the community to actively participate in public consultation processes on planning and development of renewable energy at the local level;
- ❖ Encouraging and supporting the dialogue on the development of renewable energy initiatives between government officials, civil society and private sector at local level through the reinforcement of public participation mechanisms;
- ❖ The dialogue was brought under the expertise available within the framework of the Aarhus Information Centre network to ensure that renewable energy development is not a mere technical issue for engineers and government officials but rather a broad public commodity to be discussed and accepted in a wider public field;
- ❖ The projects will work closely with the local civil society to raise community awareness of renewable energy potential and how the renewable energies can potentially mitigate environmental effects and produce social economic benefits.

### **Activities undertaken:**

The activities were undertaken in the framework of the project "*Supporting the integration of environmental and public consultation mechanisms in central and local policies and projects*", included all the community groups: NGO's representatives, local officials, local stakeholders, business group, engineers, youths, women, active citizens, etc.

The activities were followed by three steps:

- i. Meetings with citizens, stakeholders and local officials;
- ii. Creating CAC (Citizen Advisory Committees);
- iii. Workshops.

## **Meetings with citizens, stakeholders and local officials:**

There have been organized meeting with representatives of civil society, business people of the respective areas and local officials based on the database available at the Vlora Aarhus Information Centre which was created by projects implemented in these areas in the past. The meeting were organized in the Vlora Region towns of Orikum, Himare, Lukove, Sarande and Ksamil, where the project was implemented

- Meetings with citizens

This first meeting was held with representatives of civil society, business, stakeholders and citizens in Municipalities of Orikum, Himara, Saranda / Ksamili and Lukove Communes. At this meeting were presented the idea of creating local Citizen Advisory Committees, the role of CAC as a advisory authority for the Council City and local governments, who will be in their composition and how will work this structure in the function of the dialogue between citizens and municipalities or communes. The project was welcomed by the majority of citizens meet, although some citizens were a bit sceptic about this structure and its cooperation with local government units.

- Meetings with stakeholders

In order to receive the perception of local stakeholders, business people and local investors about renewable energy prospect, the ways of cooperation with possible donors and local officials, there were organised meetings with fourteen of them. The meetings were taking place mainly at their premises and were focused on their role they would play for renewable energy sector. Most of the stakeholders that we visited, supported the initiative and agreed that the renewable energy sector is very profitable and with a low cost on environmental impacts..

- Meetings with local officials

During the meeting organized with public officials in 5 Municipality and Communes of Vlore Region it was presented the idea of cooperating with groups of interest during, civic society, youths, women and stakeholders for the process of local planning and programs. The cooperation should be based on dissemination of information and public participation in projects realized in respective areas well ahead they are about to start.

There were organised five meetings with local officials, counsellors and mayors in five municipality and communes, respectively in Orikum, Himare, Lukove, Sarande and Ksamil.

## **Creating CAC (Citizen Advisory Committees):**

The aim of CAC was to assist local government and Commune Council during decision making for local environmental issues and investments that do affect citizen's life. The citizens expressed their commitment for Citizens Advisory Committees and offered their support for creating such advisory structures. In this initiative were also involved local counselees and local officials providing us with data of the local stakeholders. There were organised two meetings for each of 5 Communes and Municipalities for the creation of the CAC-s. The first meetings were

mainly aiming to inform citizens, youths, women and stakeholders about the initiative, its duty, how it will function and the role of it, in holding the local government accountable for their decisions. The second meetings were aiming to create the Commissions. At all meetings there were present women and youths too. The meetings were very constructive and there were a lot of local issues raised on which the Commissions can play a role in the future. It was made clear to all participants that the Commission structures are based on a voluntaristic basis, and for the benefit of the entire community. An interesting part was the selection of the Commission's Coordinator. The selection of them went through a fair process, firstly by nominating two or three candidates by the participants themselves and then they selected one of them, with the consensus of all participants based on the local reputation and contribution for the local community. It is also a great achievement that out of five CAC coordinators three of them are women.

The total number of the participants in all the meetings was: 86

The number of the women was: 37

The number of the youths was: 34

## **Workshops**

The final activity of this project was organising of five workshops in each Municipality and Commune selected. The workshop was organised with the cooperation of OSCE, the local government units, Ministry of Energy and Industry, National Agency of the Natural Resources, UNDP and the community groups. All the participants were optimistic about the cooperation of local government with the stakeholders, about the benefits of the community for the renewable energy projects. In each workshop there were present either the Mayors or Deputy Mayors, the Council chair and the chair of the villages included in the project. The workshops were organized as open discussions, for exchanging ideas, thoughts and suggestions about renewable energy and the role of citizens in implementing such projects in south Albania.

Firstly were presented the findings of a research based on a proper study on local perceptions for the potential for development of Renewable Energy in the south of Albania by the representative of national Environmental Organization, Milieukontakt Albania, Mrs. Valbona Mazreku. Results of the study revealed shortcomings in terms of Legislation and its implementation, the little work that has been done for informing and raising the community awareness, as well as actual situation on dissemination of information to the interested public as well as a very sporadic usage of the renewable energy potentials in these areas.

The representatives of the National Agency of Natural Resources Mr. Artan Leskoviku presented the current Legislation, always in the field of renewable energies as well as a reflection of the ongoing exploitation of renewable energies. Full coverage of the current situation implied that the contribution of Renewable Resources in Albania is 29.3%, measure very small compared to what is offered but he said that with the legal support to policies is planned to attend a series of investments and projects in a very near future.

Also one of the partners of this project, Mrs. Mirela Kamberi representative of the United Nations Development Project (UNDP) presented a set of projects implemented by UNDP in the

world and Balkan area and set a packet of the necessary technical aspects for the effectiveness usage (mainly solar panels). Being in the implementation of a project, UNDP provided solar panels of a Public Institution of the five municipalities and communes involved in the project of Aarhus Information Centre. This made the project not only stay in the theoretical/awareness/supportive aspect but also a practical and facilitator for various institutions.

These presentations made the information of the guests about the issue of Renewable Energies and after a constructive discussion took the eye of wide interest and positive feedback on the use of renewable energies.

The workshops were finalized with a very significant expression of Mayor of Saranda Municipality: "We live in a country that is blessed by god, true, but potentially inexhaustible missing investments, so let us be the first to invest and to get the benefits of this precious treasure of the Albanian nature".

The total number of the participants in all workshops was: 98

The number of the women: 42

The number of the youths: 37

#### **Achievement of the objectives:**

- ❖ By bringing together the citizens, stakeholders and local government units it was firstly created the ground for collaboration between them for general issues concerning the community and familiarising with renewable energy initiatives;
- ❖ It has been established the constructive dialog among local stakeholders, citizens and local government through direct conversations and public forums;
- ❖ Under the expertise available within the framework of the Aarhus Information Centre was established a collaboration between local government and the local civil society, in order to have a closer approach with all the community groups and the private sector;
- ❖ Through the structure of Citizens Advisory Committees has been introduced a new approach for participation of citizens in decision making process in local plans and programs in general and for the issue of the renewable energy in particular;
- ❖ Through exchanging the ideas and experiences from the participants during workshops was intended to have a wider prospect of everyone about the role that renewable energies play for the benefits of all interested groups and community rather than only investors or local government.

## **Evaluation of the Project**

- ❖ We encountered some minor problems at the first meetings at some Commune by the Counsel Chair as they thought that the CAC structure will be somehow replacing the Commune Counsel and therefore was not needed to be created at all. Through explanation of the idea of CAC for their role as volunteer groups of citizens that will serve as a mediator between citizens and Counselors and local officials for plans and projects being implemented in the area we overcome this problems;
- ❖ The first month was done a preparatory work, creating contacts and explaining the project plan to the citizens groups, NGOs and local stakeholders. Than will be started the explaining the idea of Citizens Advisory Committees among citizens, stakeholders, business people, civic society and the local government. The media also played a crucial role in evaluation process as they broadcasted the events organized in each Commune and Municipality. Also it was stressed the advantages of renewable energy initiatives not only as a way to protect the environment but also as a financial benefits for entire community;
- ❖ The project is considered to be successful as there was a good cooperation and support from local government and citizens, so we found no difficulties in creating the Citizens Advisory Commissions in each Commune and Municipality selected;
- ❖ It was also created a good model of public consultation not only between citizens and local government, but also with central government too through public forums discussing the renewable energy initiatives in local level.

## ***Recommendations***

- Increase the collaboration between local government and interest groups, local civil society, private businesses and community, by creating sustainable relationships between them.
- Strengthening relations between Local Government and local Civil Society Organizations by the involvement of citizens in implementation of various projects in local level.
- Increasing the public awareness campaigns for the general public to present their rights in local decision making.
- The local Government Units should facilitate the access to issues that concern the community and full disclosure of information about various issues in general and about the development potential of renewable energies in particular.

- Increase the public awareness of community about the benefits of using the renewable energy resources financially and environmentally for everyone. Awareness campaigns can be made in various ways, such as tv spots in central and local media, leaflets, public forums, round tables etc.
- Provide all available information about renewable energy from engineers and specialists dependent from Municipality / Commune, so that it becomes a preliminary estimate for the efficiency of using a renewable energy source.
- Make available to the interested public statistics and analyses of the current exploitation of renewable resources, how effective they have been and how energy savings can be made by the actual energy bills.
- Support and encourage private sector which are replacing a part of electricity with solar energy (hotels use panel solar water heating), through financial incentives or to give the possibility to expand the surface of the panels for using that energy in other necessary activities.
- Ensuring the longevity of the panels. For eg. Himara has a life expectancy of solar panels one year, which is caused by the quality of the water used in the panel deposits. For this case, finding a new water source or filter the current water will help in proper functioning and longevity of the panels in the area.
- Provide training courses for young people for assembly, monitoring and maintenance of equipment that are used for the provision of renewable energy.
- Implementation of various projects, without great cost but exceeding the theoretical framework and serve as a positive example for all the community. Creating the draft planning projects and development of renewable energy at the local level.
- Conducting various studies in areas that have great potential for renewable energy development targeting and attracting various investors whether foreign or domestic.
- Include in the Budget or the Municipalities and Communes (with a value of 10% of the budget) of Renewable Energy Sources favoring their development locally.
- Making recommendations to central and local government, this will serve for the preparation of the relevant regulations and will reflect the reality on the ground.

- Organize workshops and trainings on issues of renewable energies, in collaboration with Civil Society Organizations in the Ministry of Energy and Industry, the National Agency of Natural Resources for citizens, stated interest groups, local government, etc.

16 TETOR 2013

SALLA E MBLEDHJEVE, BASHKIA ORIKUM

#### PROGRAMI

09:00 – 09:30	<b>Regjistrimi i pjesëmarrësve</b>
09:30 – 09:40	Mirëseardhja dhe moderim nga Z. Robert Murataj, Menaxher i Qendres së Informacionit Aarhus
09:40 – 09:45	Përshëndetje nga Z. Gezim Capoj, Kryetari i Bashkisë Orikum
09:45 – 09:50	Përshëndetje nga Z. Agim Bregasi, Drejtor i Politikave Energjetike, Ministria e Energjisë dhe Industrisë
09:50 – 09:55	Përshëndetje nga Z. Elton Qëndro, Prezenca e OSBE-së në Shqipëri
09:55 – 10:20	Prezantimi i raportit të vlerësimit mbi “ <i>Perceptimet Lokale për Zhvillimin e Energjive të Rinovueshme në Jug</i> ”. Znj. Valbona Mazreku, Eksperte Diskutime
10:30 - 10:45	<b>Pushim kafe</b>
10:45 - 12:00	Prezantim i politikave dhe legjislacionit vendas në fushën e energjisë së rinovueshme <i>Prezantim nga Z. Artan Leskoviku, Agjensia Kombëtare e Burimeve Natyrore</i> Diskutime
12:15– 13:00	Prezantim i projektit të UNDP në fushën e Paneleve Diellore për Ngrahjen e Ujit: Iniciativat dhe bashkëpunimi në nivel lokal. <i>Prezantim nga Znj. Mirela Kamberi, Drejtuese Programi, PNUD Shqipëri</i> Diskutime
13:00- 13:15	Përfundime dhe konkluzione
13:15	<b>Bufe</b>

## MoU Orikum

Nr 1412 prot  
Data 30.08.2013

### MARRËVESHJE MIRËKUPTIMI

Kjo Marrëveshje Mirëkuptimi ndërmerret në kuadër të projektit "**Mbështetja e integritit mjedisor dhe mekanizmave të konsultimit publik në politikat e pushtetit qendror dhe vendor**", të mbështetur nga Prezenca e OSCE në Shqipëri dhe zbatuar nga Qendra e Informacionit Aarhus-Vlorë.

#### Kuadri ligjor

Në mbështetje dhe zbatim të Ligjit nr.8652, datë 31.07.2000 "Për Organizimin dhe Funksonimin e Qeverisjes Vendore" neni 8, Të drejtat e njësive të qeverisjes vendore 1. Njësitë e qeverisjes vendore gëzojnë këto të drejta: l. E drejta e qeverisjes: pika d) Krijojnë komitete, borde ose komisione për kryerjen e funksioneve të veçanta sa herë që paraqitet nevoja dhe neni 19 "Buxheti i njësive vendore" pika c) dhënien e informacionit të nevojshëm, që u mundëson qytetarëve pjesëmarrjen në vendim-marrje në lidhje me funksionet dhe kompetencat e ushtruara nga njësia e qeverisjes vendore përkatëse në vullnetin e tyre të plotë dhe respekt ndaj qytetarëve; në kuadër të parimeve të Konventës së Aarhus-it për të drejtën për informim, pjesëmarrje publike në vendim-marrje dhe të drejtën e ankimit për çështjet mjedisore.

Bashkia e Orikumit e përfaqësuar nga Kryetari i Bashkisë **z. Gëzim Çapo**

dhe

Komisioni Këshillimor Qytetar Orikum, përfaqësuar nga koordinatori, **z. Nigero Ballb**,

Zotohen për të bashkëpunuar në rritjen e pjesëmarrjes dhe angazhimin e shoqërisë civile dhe për forcimin e ndërveprimit mes qeverisë vendore, shoqërisë civile, grupeve të interesit dhe qytetarëve.

Komisioni Këshillimor Qytetar Orikum (KKQ) është grupim vullnetar me përfaqësim të gjerë, me qytetarë që kanë vizion dhe duan të mundësojnë ndryshime pozitive në qytetin e tyre, i cili do të shërbejë si organ këshillimor për Bashkinë. Ai do të jetë gjithëpërfshirës dhe i pavarur nga kontrolli prej njësisë vendore. KKQ do të përbëhet nga drejtues dhe përfaqësues të shoqërisë civile, bizneseve, rinisë, grave dhe grupeve të marginalizuara.

KKQ synon të bëjë të mundur trajtimin e sa më shumë çështjeve dhe shqetësimeve të komunitetit që al përfaqëson. KKQ do të mblidhet rregullisht për çështje që lidhen me buxhetimin me pjesëmarrje, paketën vjetore fiskale, ofrimin dhe cilësinë e shërbimeve vendore, planifikimin e territorit si dhe me përparësitë dhe projektet e Bashkisë dhe në diskutimet e tyre do të ftohen të marrin pjesë edhe punonjës nga njësia e qeverisjes vendore.

#### Objektivat

Objektivi kryesor i KKQ është të rrisë pjesëmarrjen e qytetarëve në vendim-marrje nëpërmjet përfaqësimit të zërit të grupeve të interesit në planet dhe programet e qeverisjes vendore. Kjo nismë synon të krijojë një mekanizëm që do t'u bëjë të mundur qytetarëve të mësojnë më shumë për njësinë e tyre të qeverisjes vendore, të vendosin për çështje të rëndësishme që lidhen me qytetin e tyre dhe të bëjnë rekomandime për këto çështje.

#### Funksionimi

Për të arritur objektivin e vet, KKQ do të mbledhet minimalisht katër herë në vit për çështje dhe tema të rëndësishme që janë parashtruar nga qytetarët, grupet e interesit dhe shoqëria civile. Edhe punonjësit e Bashkisë mund të sjellin në vëmendje të KKQ-së tema që ata mendojnë se janë të rëndësishme.

#### Anëtarësia

KKQ është grupim vullnetar dhe përbëhet nga përfaqësues të komunitetit vendor, komuniteti i biznesit, të rinj, gra, grupe të marginalizuara, media lokale, etj, me synim përfaqësim sa më të gjerë të grupeve të interesit dhe organizatave të shoqërisë civile.

#### Institucionalizimi

KKQ institucionalizohet si organ këshillimor i Bashkisë me anë të një Marrëveshje Mirëkuptimi të nënshkruar nga të dy palët. KKQ do të funksionojë si organizëm vullnetar me praninë e të gjithë përfaqësuesve nga të gjitha grupet e interesit. KKQ ka një koordinator që do të bashkërendojë punët brenda grupit si dhe do të përfaqësojë grupin në marrëdhëniet me Bashkinë.

#### Rolet dhe Përgjegjësitë

KKQ mbledhet rregullisht siç përcaktohet në këtë dokument dhe sa herë që kërkohet për çështje të rëndësishme që shqetësojnë komunitetin. KKQ ka funksion konsultativ dhe këshillimor, por jo vendim-marrës. Anëtarët e tij sjellin në vëmendje të komisionit çështje që shqetësojnë komunitetin lokal dhe hartojnë rekomandime për t'i paraqitur ato pranë njësisë vendore me qëllim përmirësimin e shërbimeve të ofruara nga pushteti lokal për qytetarët .

Kjo Marrëveshje Mirëkuptimi (MM) institucionalizon autoritetin e KKQ si partner konsultativ dhe këshillimor pranë Bashkisë Orikum. Përmes kësaj Marrëveshjeje Mirëkuptimi Bashkia Orikum angazhohet të pranojë, mbështesë dhe konsiderojë Komisionin Këshillimor Qytetar Orikum partner në proceset konsultuese për çështje që lidhen me zhvillimin e qytetit.
